

1. Fix four wheels and supporters with screws on the bottom

2. Note that there are four fixing screws at the four corners of the bottom

3. Install the frames on the bottom, and fix the four beams

4. Install the top cover on the other end of frames. ( There is a cable entry on the top cover, it should be on the back direction)

5. Note that there are four fixing screws at the four corners on the top cover.

6. Fix the tray / shelf on the beams with cage nuts, it could be flexible position as required

7. Install the doors (front / back) and side panels.
