#### Intelligent access control and

#### attendance all-in-onemachine

The manual

Please read this manual carefully before installation and keep it well for reference at any time

#### The equipment parameters:

The product name	Intelligent access control and attendance all-in-one machine	
The operating system	Real-time control of the operating system	
display	4.3 inch LCD, capacitive touch screen	
camera	Binocular 2 megapixels	
Fill light	LED high light filling lamp (automatic control according to ambient light)	
The intelligence function	Infrared liveness identification/dynamic face recognition	
Face/password/card/ fingerprint	2000/2000/2000/2000	
User record	Article 100000.	
The power supply requirements	DC12V 2-5A	
current	Static operating current 210mA/operating current 350mA	
Communication methods	TCP/IP wired communication/(WiFi optional)	
Language shows	Simplified Chinese/English	
Access control function	Door sensor/doorbell/manual door opening	
Access control interface	A set of switching signals, a set of Wiegand signals	
Identify ways	Dynamic face/password /IC card/live fingerprint	
Working temperature	-10 to 60 degrees Celsius	
Voice prompt	High definition human voice	
The data collection	Usb disk to export data reports or computer software to collect data through network connected devices	
Wiegand signal input	1 set WG26/34 (external read heads can be attached)	
Wiegand signal output	A set of WG26/34 outputs (can be used as read heads external to the controller)

## $\Xi$ .Basic operation

#### Click this icon to enter the menu

The menu is divided into: User management/machine Settings/data management/ machine information

Password verification: Enter the (id) (password) of the registered person and click (OK). Note that the account number is pure numbers.

(123) Confirm button for switching input method (OK)

#### 四.User management

Select (Add user) \to input personnel information

Employee			
1.Register			
_2. View User			
3.Delete User			

(Employee ID) (name) (face) is mandatory. (Department) Filling in will affect whether the attendance software should schedule according to the department. (Password) The combination of id and password will be added after you enter the password. The password and ID are only digits. (Card code) is IC/ID card number. After adding (card code), swipe the corresponding card to pass the verification. The card number is an alphanumeric combination.

(Fingerprint) After a fingerprint is successfully registered, the corresponding fingerprint can be verified.

(Permission) The default user is user. After you switch to administrator, you need to verify the administrator permission before entering the management Settings page.

## 五.Time Settings/record Settings

Set year/month/day

Set the time/minute/second

Press (OK) to confirm

Record warning can be set to 1-999 times. Repeat confirmation time can be set to 0-99

## 六.Machine set up

Click on this icon (Machine Settings) to enter Settings

DevSet	Network
1 General Setting	1. Ethernet
2. Advance Setting	2. Server Set
3. Att. Rule	
4 Date&Time	
5. Set COMM	
6. LockCtrl	
7. Records	

Note: To switch languages, restore factory Settings

(Common Settings) Enter Settings 1. 2. Set the volume 1-8; 3. Screen saver Can be set to close the screen after 0-99 seconds to enter the screen saver. (Advanced Settings) Enter Settings 1. Delete all records. 2. Delete all users.

3. Restore the factory value.

(Attendance rules)Enter Settings 1. Company name: 2. Department management; 3. Flight time; 4. Statistical rules; 5. Time ring;

(Time setting) Enter setting to set year/month/day/hour/minute/second; (Communication Settings) Enter Settings 1. Ethernet Settings; 2. Set the server.

(Access control function) Entry setting 1. Unlock delay; 2. Door status sensor setting; 3. Unlock mode; 4. Wiegand output setting; (Record setting) Enter Settings 1. Attendance record warning; 2. Repeat the confirmation time.

### 七.Data management

Click (Data Management) to enter data Export/Import

U–Down	Attn.	Report	
1 Attn Ronart			
		2022-02-	
		2022-02-	
<b>S</b>			

(Attendance report export) Insert the U disk, click (Attendance report Export) to select the attendance month, and the attendance record of this month will be exported as well as the tool to generate attendance report. Please refer to the exported attendance manual.

(Export raw data) Insert the usb flash drive. Click (Export Raw Data) to export the registered data of the device to the USB flash drive.

(Scheduling personnel information export) Insert the USB flash drive, click (Scheduling personnel information export) to export the USB flash drive. (Importing the personnel information of the schedule) Insert the USB flash drive, and click (Importing the personnel information of the Schedule) to import the data in the USB flash drive to the device.

(Download all user data) Insert the USB flash drive. Click (Download All User Data) to export all user data from the device to the USB flash drive. (Upload all user data) Insert the USB flash drive. Click (Upload all user data) to import user data from the USB flash drive to the device.

# 八. Warranty card Warranty instruction

In order to safeguard your interests, remove your worries. The company in accordance with the national three guarantees of electronic products, to provide you with 1 year of quality warranty service!
